

TATTOO AFTERCARE

- Aftercare of your tattoo will greatly determine the way your tattoo will look once it has fully healed.
- Wear your bandage for approximately 2-3 hours then remove it and wash the tattoo gently with DIAL Antibacterial soap.
- Gently pat dry with a paper towel. *DO NOT WIPE BACK AND FORTH.* Apply a very thin layer of vitamin A & D ointment to your tattoo after washing.
- Pat (*do not wipe*) off extra ointment if you apply too much. You should have no build up of ointment on your tattoo.
- Re-apply ointment as needed 2-3 times a day for 3-5 days. Moving to a fragrance free lotion for the remaining healing time of approximately 7-10 days.

DO NOT PICK OR SCRATCH SCABS ON YOUR TATTOO!

- Picking at your tattoo will cause your tattoo to bleed, pull ink out and leave scars. Avoid bodywash, lotions and shampoos that have fragrances for the first week of healing.
- Do NOT swim or go into a hot tub for at least 2 weeks.
- Avoid direct exposure to the sun.
- After the tattoo has fully healed, you will want to wear sunscreen over it when spending long periods in direct sunlight to keep it looking bright and new.
- Do NOT put any sunscreen on a tattoo that has not fully healed.
- Wear loose clothing over your tattoo while it heals to avoid any rubbing that may pull off scabs.
